

# The (mis)Behavior of Markets

. . . .

A FRACTAL VIEW OF RISK,  
RUIN, AND REWARD

Benoit B. Mandelbrot  
and Richard L. Hudson

A MEMBER OF THE PERSEUS BOOKS GROUP  
NEW YORK

# Contents

<i>Abstract</i>	<i>v</i>
<i>Acknowledgments</i>	<i>xi</i>
<i>Prelude: Introducing a Maverick in Science</i>	<i>xiii</i>
<i>Benoit Mandelbrot, the “father” of fractals, has made a career of going against the prevailing fashions in science.</i>	

## *Part I.* The Old Way

<i>Chapter I Risk, Ruin, and Reward</i>	<i>3</i>
<i>“Modern” financial theory is founded on a few, shaky myths that lead us to underestimate the real risk of financial markets.</i>	
<i>Chapter II By the Toss of a Coin or the Flight of an Arrow?</i>	<i>25</i>
<i>How the operations of mere chance can be used to study a financial market.</i>	
<i>Chapter III Bachelier and His Legacy</i>	<i>43</i>
<i>The study of financial theory began a century ago with a brilliant but undervalued French mathematician, Louis Bachelier.</i>	

<i>Chapter IV</i> The House of Modern Finance	59
<i>How the edifice of modern financial theory—valuing assets, building portfolios and assessing risk—was erected on Bachelier’s work.</i>	

<i>Chapter V</i> The Case Against the Modern Theory of Finance	79
<i>Orthodox financial theory is riddled with false assumptions and wrong results. A summary of the evidence against it.</i>	

<i>Pictorial Essay: Images of the Abnormal</i>	88
--	----

## *Part II.* The New Way

<i>Chapter VI</i> Turbulent Markets: A Preview	111
<i>Financial markets are turbulent—like the wind or the flood. An introduction to the fractal view of finance.</i>	

<i>Chapter VII</i> Studies in Roughness: A Fractal Primer	123
<i>How is a stock-price chart like the leaves of a fern? A survey of fractal geometry.</i>	

<i>Pictorial Essay: A Fractal Gallery</i>	132
---	-----

<i>Chapter VIII</i> The Mystery of Cotton	147
<i>The first clue to the fractal view of finance came in a study of cotton by Mandelbrot. An account of his scientific journey.</i>	

<i>Chapter IX</i> Long Memory, from the Nile to the Marketplace	173
<i>The second clue to fractal finance came from lifelong study of the Nile River by an English hydrologist, H.E. Hurst.</i>	

<i>Chapter X</i> Noah, Joseph, and Market Bubbles	197
<i>The two critical features of financial markets are wild price swings and long-term dependence—the Noah Effect and the Joseph Effect.</i>	

<i>Chapter XI</i> The Multifractal Nature of Trading Time	207
<i>In financial markets, time speeds up and slows down—as described in the multifractal model of markets.</i>	

### *Part III.* The Way Ahead

<i>Chapter XII</i> Ten Heresies of Finance	225
<i>How do financial markets really work? A list of key insights provided by the fractal view of finance.</i>	

<i>Chapter XIII</i> In the Lab	253
<i>So how can the study of fractals change finance? A program for future research.</i>	

<i>Notes</i>	277
<i>Bibliography</i>	303
<i>Index</i>	319
